

Professional Appointments

| | | |
|----------------------------------|----------------------------|---------|
| Assistant Professor | University of Windsor | Current |
| Adjunct Research Professor | Carleton University | Current |
| Adjunct Assistant Professor | University of Windsor | 2020 |
| Postdoctoral Researcher | Carleton University | 2020 |
| Postdoctoral Researcher | University of Waterloo | 2019 |
| Visiting Postdoctoral Researcher | Wilfrid Laurier University | 2019 |
| Research Intern | Maplesoft | 2018 |

Education

| | | |
|----------------------------------|------------------------|------|
| PhD, Computer Science | University of Waterloo | 2017 |
| MMath, Computational Mathematics | University of Waterloo | 2009 |
| BMath, Computational Mathematics | University of Waterloo | 2008 |

Research Interests

Computer-assisted proofs, satisfiability solving, symbolic computation, discrete mathematics, experimental mathematics.

Grants

| | |
|--|------|
| Mitacs Globalink Grant (total funding of about \$9K for one summer intern) | 2024 |
| Mitacs Globalink Grant (total funding of about \$9K for one summer intern) | 2023 |
| Digital Research Alliance of Canada Resource Allocation (awarded 170 years of processing time and 20 terabytes of storage; worth around \$20K) | 2023 |
| Mitacs Globalink Grant (total funding of about \$18K for two summer interns) | 2022 |
| NSERC Discovery Grant (\$145K with a \$12.5K Discovery Launch Supplement) | 2021 |
| Startup Grant, University of Windsor (\$70K) | 2021 |
| NSERC Postdoctoral Fellowship (\$90K) | 2020 |
| Co-authored the research proposal “Amazon AWS for Automated Reasoning” that was awarded \$145K USD in Amazon AWS Credits. (PI: Vijay Ganesh) | 2019 |

Submitted Publications

Y. Ajani, *C. Bright*. A Hybrid SAT and Lattice Reduction Approach for Integer Factorization.

Z. Li, *C. Bright*, V. Ganesh. A SAT Solver + Computer Algebra Attack on the Minimum Kochen–Specker Problem.

C. Bright. A New Lower Bound in the *abc* Conjecture.

Invited Tutorials

Isomorph-Free Exhaustive Generation in SAT Solving. New Perspectives in Symbolic Computation and Satisfiability Checking, Dagstuhl Seminar, Wadern, Germany, February 17, 2022.

Invited Talks

SAT and Computer Algebra. SAT Encodings and Beyond, Dagstuhl Seminar, Wadern, Germany, June 27, 2023.

A SAT and Orderly Generation Approach in the Quest for the Minimum Kochen–Specker System. Canadian Discrete and Algorithmic Mathematics Conference, Winnipeg, Canada, June 6, 2023.

SAT + Isomorph-free Generation ... and the Quest for the Minimum Kochen–Specker System. Pushing the Limits of Computational Combinatorial Constructions, Dagstuhl Seminar, Wadern, Germany, April 20, 2023.

SAT Solvers, Isomorph-free Generation, and the Quest for the Minimum Kochen–Specker System. SFU Discrete Mathematics Seminar, Vancouver, Canada, February 8, 2023.

SAT Solvers, Isomorph-free Generation, and the Quest for the Minimum Kochen–Specker System. UBC Discrete Mathematics Seminar, Vancouver, Canada, February 7, 2023.

Searching for Kochen–Specker Systems With Orderly Generation and Satisfiability Solving. Applications of Computer Algebra, Gebze Technical University, Istanbul, Turkey, August 15, 2022.

Searching for Kochen–Specker Systems With Orderly Generation and Satisfiability Solving. Satisfiability: Theory, Practice, and Beyond Reunion, Simons Institute, Berkeley, USA, June 16, 2022.

SAT Solving with Computer Algebra for Combinatorics. Tutte Colloquium, University of Waterloo, Waterloo, Canada, April 1, 2022.

When Computer Algebra Meets Satisfiability: A New Approach to Combinatorial Mathematics. New Technologies in Mathematics Seminar Series, Harvard University, Cambridge, USA (with Vijay Ganesh), November 3, 2021.

Satisfiability Checking + Symbolic Computation: A New Approach to Combinatorial Mathematics. LAPIS Meeting, Rice University, Houston, USA (with Vijay Ganesh), July 12, 2021.

SAT Solvers for Combinatorics Problems. CanaDAM 2021 (Held Online), May 25, 2021.

Computational Algebra and Logic for Mathematical Search. University of Windsor Department of Mathematics and Statistics Colloquium, Windsor, Canada (Held Online), May 6, 2021.

Computer Algebra and SAT for Mathematical Search. Theoretical Foundations of SAT/SMT Solving, Simons Institute, Berkeley, USA (Held Online), April 21, 2021.

A Resolution of Lam’s Problem via Satisfiability Solvers. Canadian Mathematical Society Winter Meeting, Montréal, Canada (Held Online), December 4, 2020.

SAT Solving with Computer Algebra for Fast, Verified Mathematical Search. University of Windsor School of Computer Science Seminar, Windsor, Canada, March 12, 2020.

SAT Solving with Computer Algebra and its Application to Graph Theory and Geometry. Computational Geometry Lab Seminar, Ottawa, Canada, February 28, 2020.

SAT Solving with Computer Algebra: A Powerful Combinatorial Search Method. UBC Discrete Mathematics Seminar, Vancouver, Canada, September 10, 2019.

SAT Solving with Computer Algebra: A Powerful Combinatorial Search Method. University of Victoria Discrete Mathematics Seminar, Victoria, Canada, September 6, 2019.

SAT Solving with Computer Algebra: A Powerful Combinatorial Search Method. SFU Discrete Mathematics Seminar, Vancouver, Canada, September 3, 2019.

SAT+CAS: A Powerful New Combinatorial Search Method. Ottawa–Carleton Combinatorics & Optimization Seminar Series, Ottawa, Canada, October 5, 2018.

Faster SAT Solving with Applications to Sudoku. Maplesoft, Waterloo, Canada, August 31,

2018.

Improvements to Satisfy and ChromaticNumber. Maplesoft, Waterloo, Canada, March 23, 2018.

Accepted Minisymposiums

Computer-Assisted Mathematics. Ninth Canadian Discrete and Algorithmic Mathematics Conference, Winnipeg, Canada, June 5, 2023. Speakers: Taylor Brysiewicz, Cayden Codel, Craig S. Kaplan, Narad Rampersad, Brett Stevens.

Conference and Workshop Talks

Effective Problem Solving using SAT Solvers. Canadian Discrete and Algorithmic Mathematics Conference, Winnipeg, Canada, June 5, 2023. (Impromptu talk given to replace a speaker whose flight was cancelled.)

A New Lower Bound in the *abc* Conjecture. Canadian Discrete and Algorithmic Mathematics Conference, Winnipeg, Canada, June 5, 2023.

Solving Lam's Problem via SAT and Isomorph-Free Exhaustive Generation. Principles of Knowledge Representation and Reasoning, Haifa, Israel, August 3, 2022.

A SAT-Based Resolution of Lam's Problem. AAI Conference on Artificial Intelligence, Vancouver, Canada (Held Online), February 3, 2021.

Unsatisfiability Proofs for Weight 16 Codewords in Lam's Problem. International Joint Conference on Artificial Intelligence, Yokohama, Japan (Held Online), January 14, 2021.

Nonexistence Certificates for Ovals in a Projective Plane of Order Ten. International Workshop on Combinatorial Algorithms, Bordeaux, France (Held Online), June 8, 2020.

SAT Solvers and Computer Algebra Systems: A Powerful Combination for Mathematics. International Conference on Computer Science and Software Engineering, Markham, Canada, November 4, 2019.

Effective Problem Solving using SAT Solvers. Maple Conference 2019, Waterloo, Canada, October 17, 2019.

Searching for Projective Planes with Computer Algebra and SAT Solvers. Applications of Computer Algebra, Montréal, Canada, July 19, 2019.

A SAT+CAS Approach to Finding Good Matrices: New Examples and Counterexamples. AAI Conference on Artificial Intelligence, Honolulu, USA, January 30, 2019.

MathCheck: A SAT+CAS Mathematical Conjecture Verifier. International Congress on Mathematical Software, Notre Dame, USA, July 26, 2018.

Enumeration of Complex Golay Pairs via Programmatic SAT. International Symposium on Symbolic and Algebraic Computation, New York, USA, July 17, 2018.

A SAT+CAS Method for Enumerating Williamson Matrices of Even Order. AAI Conference on Artificial Intelligence, New Orleans, USA, February 4, 2018.

A SAT+CAS Method for Enumerating Williamson Matrices of Even Order. International Workshop on Satisfiability Checking and Symbolic Computation, Kaiserslautern, Germany, July 29, 2017.

MathCheck2: Combining Learning-based Search (SAT) with Symbolic Computation (CAS). International Workshop on Satisfiability Checking and Symbolic Computation, Timișoara, Romania, September 24, 2016.

MathCheck2: A SAT+CAS Verifier for Combinatorial Conjectures. Computer Algebra in Scientific Computing, Bucharest, Romania, September 20, 2016.

MathCheck: A Math Assistant Combining SAT with Computer Algebra Systems. International Joint Conference on Artificial Intelligence, New York, USA, July 12, 2016.

MathCheck2: A SAT+CAS Verifier for Combinatorial Conjectures. International Workshop on Satisfiability Modulo Theories, Coimbra, Portugal, July 2, 2016.

MathCheck2: A SAT+CAS Verifier for Combinatorial Conjectures. Computationally Assisted Mathematical Discovery and Experimental Mathematics, London, Canada, May 13, 2016.

Vector Rational Number Reconstruction. International Symposium on Symbolic and Algebraic Computation, San Jose, USA, June 9, 2011.

Poster Presentations

A SAT-Based Resolution of Lam’s Problem. AAI Conference on Artificial Intelligence, Vancouver, Canada (Held Online), February 3, 2021.

Unsatisfiability Proofs for Weight 16 Codewords in Lam’s Problem. International Joint Conference on Artificial Intelligence, Yokohama, Japan (Held Online), January 14, 2021.

A SAT+CAS Approach to Finding Good Matrices. AAI Conference on Artificial Intelligence, Honolulu, USA, January 30, 2019.

The SAT+CAS Paradigm and the Williamson Conjecture. International Symposium on Symbolic and Algebraic Computation, New York, USA, July 17, 2018.

A SAT+CAS Method for Enumerating Williamson Matrices of Even Order. AAI Conference on Artificial Intelligence, New Orleans, USA, February 4, 2018.

Vector Rational Number Reconstruction. East Coast Computer Algebra Day, Waterloo, Canada, April 9, 2011.

Teaching

University of Windsor

| | | |
|---|--------------|-------------|
| Introduction to Algorithms and Programming II | 71 students | Fall 2022 |
| Computational Mathematics | 5 students | Fall 2022 |
| Introduction to Algorithms and Programming II | 80 students | Summer 2022 |
| Key Concepts in Computer Science | 48 students | Summer 2022 |
| Introduction to Algorithms and Programming II | 167 students | Winter 2022 |
| Key Concepts in Computer Science | 93 students | Winter 2022 |
| Computational Discrete Mathematics | 2 students | Fall 2021 |
| Introduction to Algorithms and Programming II | 111 students | Winter 2021 |

University of Waterloo

| | | |
|--|-------------|-----------|
| Elementary Algorithm Design and Data Abstraction | 88 students | Fall 2015 |
|--|-------------|-----------|

| | | |
|------------------------------------|--------------|-------------|
| Introduction to Computer Science 1 | 145 students | Spring 2015 |
| Designing Functional Programs | 103 students | Fall 2014 |

Awards

| | |
|---|------|
| <i>Machine Assisted Proofs 2023</i> Attendee Award (accomodation up to \$1235 USD covered for selected attendees of workshop) | 2023 |
| <i>Applications of Computer Algebra</i> Early Researcher Award (with prize of about \$850) | 2022 |
| Judges' Choice Award at the 2021 Maple Conference Mathematical Art Gallery. | 2021 |
| Recipient of the €4,000 Jacques Calmet award for the best paper appearing in the journal <i>Applicable Algebra in Engineering, Communication and Computing</i> in the year of 2020. | 2021 |
| Recipient of a Maple Application Center Editor's Choice award for developing an interactive Maple worksheet demonstrating how to solve Sudoku using a SAT solver. | 2018 |
| Invited paper in the Journal of Automated Reasoning. | 2017 |
| Received a 0x\$1.20 reward check from Donald Knuth for pointing out an error in <i>The Art of Computer Programming</i> . | 2017 |
| Invited paper in the SC ² track at Computer Algebra in Scientific Computing. | 2016 |
| Recipient of the Morgan Deters award, a \$1200 USD travel grant awarded to select graduate students in the field of Satisfiability Modulo Theories. | 2016 |
| Recipient of a TA performance award, receiving \$500 for outstanding performance as a teaching assistant. | 2013 |
| Recipient of a University of Waterloo Computer Science special graduate scholarship, receiving \$1000 for my academic standing. | 2011 |

Peer Reviewed and Deployed Programming

| | |
|--|------|
| Contributor to the computer algebra system Maple 2018 and 2019. My research led to a dramatic improvement in the performance of graph theory and logic commands. | 2018 |
| Lead developer of the SAT+CAS system MathCheck for verifying or finding counterexamples to combinatorial conjectures. | 2016 |
| Contributor to the open source number theory library FLINT. Oversaw the implementation of a fast lattice basis reduction algorithm. | 2014 |

Student Supervision

| | |
|--|------|
| Zhengyu Li (PhD Computer Science, Georgia Tech). Mentoring a project to apply SAT solvers and computer algebra to problems in physics (with Vijay Ganesh). | 2023 |
| Piyush Jha (PhD Computer Science, Georgia Tech). Mentoring a project to combine Monte Carlo tree search and SAT solving (with Vijay Ganesh). | 2023 |
| Sadman Sakib (Msc Computer Science, University of Windsor). Mentoring a project to apply SAT solvers to program synthesis (starting September 2023). | 2023 |
| Aaron Barnoff (BSc Computer Science, University of Windsor). Mentoring a project to minimize discrete finite automata using SAT solvers. | 2023 |

Tyler Lumsden (BSc Computer Science, University of Windsor). Mentoring a project to search for certain kinds of complementary sequences. 2023

Ambrose Colinot (Summer Intern, University of Windsor). Mentoring a project to search for perfect quaternion sequences as a part of the 2022 Mitacs Globalink Research Internship program. 2023

Ben Chittle (BSc Computer Science, University of Windsor). Mentoring a project to certify the classification of the projective planes of order nine. 2023

Anikait Lakhota and Aayush Kapoor (BMath Computer Science, University of Waterloo). Mentoring a project to combine SAT and more expressive solvers to search for circuits computing mathematical operations like matrix multiplication (with Vijay Ganesh and Supratik Chakraborty). 2023

Amadou Keita (PhD Mathematics, University of Windsor). Mentoring a project to develop constructions for mutually orthogonal Latin squares (with Ilya Shapiro). 2022

Nahiyan Alamgir (MSc Computer Science, University of Windsor). Mentoring a project to perform cryptanalysis of hash functions using SAT solvers. 2022

Yameen Ajani (MSc Computer Science, University of Windsor). Mentoring a project to factor integers with known bits using SAT solvers (paper accepted to the SC² workshop 2023). 2022

Zhengyu Li (MMath Computational Mathematics, University of Waterloo). Mentoring a project to apply SAT solvers and computer algebra to problems in physics (with Vijay Ganesh). 2022

Conor Duggan (MMath Computational Mathematics, University of Waterloo). Mentoring a project to apply SAT solvers and computer algebra to problems in Ramsey theory (with Vijay Ganesh). 2022

Shreyash Mutyalwar (Summer Intern, University of Windsor). Mentored a project to experimentally test Schnorr's algorithm for factoring integers using Diophantine approximation as a part of the 2022 Mitacs Globalink Research Internship program. 2022

Vidyanshu Mishra (Summer Intern, University of Windsor). Mentored a project to experimentally test an algorithm for factoring integers with known bits using SAT solvers as a part of the 2022 Mitacs Globalink Research Internship program. 2022

Daniel Dallaire (BSc Mathematics and Computer Science, University of Windsor). Mentored a project to certify the classification of the projective planes of order nine (paper accepted to the SC² workshop 2022). 2021

Zhengyu Li (BSc Computer Science, University of Toronto). Mentored a project to apply SAT solvers and computer algebra to problems in physics (with Vijay Ganesh). The project resulted in the first improvement on the best known lower bound of the size of a Kochen–Specker system since 2016 (paper accepted to the SC² workshop 2022). 2021

Abinaya Venkatesan (MASc Electrical and Computer Engineering, University of Waterloo). Mentored a project to apply SAT solvers to problems in circuit complexity (with Vijay Ganesh and Supratik Chakraborty). Abinaya graduated in 2022 and is now a software engineer at the Royal Bank of Canada. 2020

Noah Rubin (BMath Mathematics, Carleton University). Mentored a Research Training Award

project for combining integer and constraint programming to search for combinatorial designs (with Kevin Cheung and Brett Stevens). The project resulted in a paper at ICTAI 2021 and a student abstract at AAAI 2022. 2020

Abhinav Baid (BEng Computer Science, Birla Institute of Technology and Science). Mentored during Google’s Summer of Code program (with William Hart). The project resulted in a high performance implementation of a lattice basis reduction algorithm in the number theory library FLINT. 2014

Service

Member of the PhD student Chris Khalil’s thesis committee. 2023

On the program committee for the *2024 AAAI Conference on Artificial Intelligence*. 2023

Co-chair of the “Algorithms and Software” track of the Maple Conference 2023. 2023

Member of the Computer Science PhD Admissions and Progress committee at the University of Windsor. 2023

Chair of the MSc thesis defence of Vishakha Gautam. 2023

Chair of the Computer Science Awards committee at the University of Windsor. 2023

On the program committee for the *2023 International Workshop on Satisfiability Checking and Symbolic Computation*. 2023

On the program committee for the *2022 International Workshop on Satisfiability Checking and Symbolic Computation*. 2022

Organizer (with Ahmad Biniiaz) of the School of Computer Science Colloquium at the University of Windsor (for 2 years). 2022

Member of the Computer Science Graduate Executive committee at the University of Windsor (for 2 years). 2022

Member of the Computer Science appointments committee at the University of Windsor (for 2 years). 2022

Associate editor of the journal *Maple Transactions*. 2021

Co-chair (with James Davenport) of the *2021 International Workshop on Satisfiability Checking and Symbolic Computation*. 2021

Member of the PhD student Abdulrauf Gidado’s thesis committee. 2020

On the program committee for the *2021 AAAI Conference on Artificial Intelligence*. 2020

On the program committee for the *2020 Maple Conference*. 2020

On the program committee for the *2020 International Workshop on Satisfiability Checking and Symbolic Computation*. 2020

Administered the webpage of the Computer Science Graduate Student Association at the University of Waterloo for several years. 2014

Have been an executive member and volunteer instructor of three university clubs: Mambo Club at the University of Waterloo, KW Salseros at Wilfrid Laurier University, and UOSalsa

at the University of Ottawa.
